

The Linguistic Audit  
Best practice in collecting data on language use and ability in an organization.  
Dr Timothy Currie Armstrong  
Sabhal Mòr Ostaig

It would be difficult to properly plan and implement a language policy without reliable and valid data on language use and ability among staff in an organization. It is accepted international good practice that one of the first steps in developing a language plan should be to collect this data on language use and ability with a linguistic audit of the organization, and indeed, Bòrd na Gàidhlig recommends a that public bodies preparing plans perform such an audit in their *Guidance on the Development of Gaelic Language Plans* (2007: 11).

In 2009, our research team at Sabhal Mòr Ostaig were asked by Bòrd na Gàidhlig to develop a new template for a language audit that could be easily adapted and used by different public bodies throughout Scotland, and in this session, I will explain some of the theory behind the template we developed and discuss how a public body might execute an audit using this template. Earlier this year, as part of this project, we were involved in an language audit of the Executive Office in Comhairle nan Eilean Siar that used an adaptation of our template, and I will draw on the insights we gained in the course of this audit to highlight some of the issues involved in conducting successful language audits, both as a source of vital data and as a tool for clarifying language policy in an organization.

## [Name of Organisation] Gaelic Language Survey

As part of our commitment to developing a bilingual workplace for our staff and to serving our Gaelic speaking customers and clients, [Name of Organisation] will be conducting an internal Gaelic language survey of all our staff every [period of time]. This information will help us to measure existing Gaelic-language use, to assess our current capacity to provide services, and to understand the Gaelic-language training needs of our staff. [Name of Organisation] is committed to proactively encouraging the use of Gaelic amongst our staff and between staff and clients and customers and the information we gather with this survey will help us plan for the development of greater Gaelic use and visibility at [Name of Organisation].

In accordance with the Gaelic Language (Scotland) Act 2005, [Name of Organisation] has prepared a Gaelic-Language Plan and is implementing this plan in the spirit of the Act, namely, "securing the status of the Gaelic language as an official language of Scotland commanding equal respect to the English language." This survey is an integral part of the implementation of our Gaelic-language plan.

The following questionnaire will ask you about your Gaelic-language ability, your Gaelic language training needs and your Gaelic-language use at work. You will also find several open-ended questions at the end of the questionnaire which will offer you the opportunity to let us know how we might better facilitate Gaelic use here at [Name of Organisation]. On average, this questionnaire should take no more than fifteen minutes to complete. Please return the completed questionnaire to [Name of Audit Coordinator] before [date].

Tapadh leibh,

[Name of Organisation Leader or Department Manager]
